**NOTICE OF CITY OF PEWAUKEE COMMON COUNCIL, PUBLIC WORKS
COMMITTEE, & OTHER GOVERNMENTAL COMMITTEES, BOARDS, AND/OR
COMMISSIONS PUBLIC INFORMATION MEETING**

Wednesday, April 30, 2025**5:30 p.m.**

Please note that Common Council officials, Public Works Committee, and members of other governmental committees, boards and commissions have been asked to attend a public information meeting at Pewaukee City Hall located at W240N3065 Pewaukee Road, Pewaukee, WI 53072.

Although several individuals representing the City will be in attendance and may form a quorum of one or more Committees, Boards, and/or Commissions, no items of business will be discussed, and no action will be taken.

The City of Pewaukee is conducting a study to consider our long – term strategy to continue to provide safe, reliable drinking water to the community. On Wednesday, April 30th a community Public Information Meeting was held to discuss the issues and options that the City plans to study this year. Municipal water is currently supplied from a combination of shallow aquifer and deep aquifer wells. Some shallow wells have levels of PFAS (per – and polyfluoroalkyl substances, sometimes referred to as “forever chemicals”) that will require new treatment systems to comply with new regulations. Some of the deep wells are currently being treated for removal of radio nuclides already, and some deep wells may require treatment in the future.

Before the City makes significant investments in these treatment systems, it is undertaking a study to consider the long-term viability of its wells compared to other alternate water sources. The City’s water supply is compliant with current Wisconsin Department of Natural Resources PFAS regulations for water quality, but the cost of continuing to treat the existing wells for radium, PFAS and future contaminants will likely continue to increase. We are committed to finding the best long-term solution. You will find the presentation slides attached for your review. Another public information meeting will take place later this year to present the findings.
